

1. GEX+ CONTEXT: Where GEX+ (\$bn) has been recently.
3. GIV CONTEXT: Where GEX-implied volatility (GIV) has been recently. Plotted alongside VIX.
5. 10% GIV-IV CONTEXT: Crash-risk (risk of >10% drop). Above 3.00x is scary. VIX in blue. Taken from GIV-IV SKEW (right). 1.00x means GIV and IV agree.

2. GEX+ HEATMAP: x=VIX, y=SPX. Beware of red zone.
4. GIV HEATMAP: x=VIX, y=SPX. GIV expressed as both vol and 1-day mean absolute deviation (%).
6. GIV-IV SKEW: 30d market IV skew (gray) vs. GIV skew (orange). VIX in blue. Orange lower means market is safer and more liquid. And vice versa.
